

# Asset Management Overview

## WHY ASSET MANAGEMENT?

Your organisation comprises of complex assets, people, processes and systems, which are used to deliver value to your stakeholders. Planning, managing and maintaining these assets is a challenging process but asset management can help your organisation overcome these challenges.

## WHAT WILL YOU LEARN?

In the training, we will cover the 6 main topics and 39 subjects of the ISO 55001 Standard as recommended by the Institute of Asset Management and the Global Forum on Maintenance and Asset Management (GFMAM). You will learn from a combination of case studies, real world examples, and learning material, which will build up a deep understanding around the impact effective asset management can have in your organisation.

## KEY BENEFITS

- ⇒ Clear direction on how to apply asset management within your organisation to gain better visibility on all of its assets
- ⇒ Roadmap for success and delivery of tangible benefits, including cost savings
- ⇒ Confidence to engage other parts of your organisation to ensure they are aligned with the elements of asset management

## TOPICS COVERED

- ⇒ Strategic Asset Management Planning
- ⇒ People and Development
- ⇒ Risk and Continuity Planning
- ⇒ Data and Information Management
- ⇒ Operations and Maintenance
- ⇒ Asset Life Cycle Cost Planning
- ⇒ Stakeholder and Communication Management

Let us take you on a journey to realise the full value from your assets.
